

3rd Grade at Zootah

Name: _____

What makes something living?

- 1.
- 2.
- 3.
- 4.
- 5.

(Needs oxygen, Grows and Changes, Needs food and water, Can reproduce, Made of cells)

Find some living and nonliving things in the zoo and record them!

Living	Non Living	Why?
Example:	Stick	It does not reproduce, or need oxygen, food or water

Challenge questions

Is a tree still a living thing if it has been cut down?

How do nonliving and living things depend on each other? Think about their environments, interactions, and what they need to survive.

Give one specific example of an animal you saw at the zoo interacting with something non living in its environment.

What things do you interact with to help survive in your environment?
